

GLASS DESIGNS OF
LAJOS CSERTŐ,
HUNGARIAN
SCULPTOR

2013

Although we can meet glass as a public sculpture material since about 50 years, it's totally up to stone or metal as a building material of statues.

Glass sculptures are such as long-life as marble or brass. It is even more resistant than the other materials, it proofs against acid rain.

Furthermore it doesn't need any maintenance, it is self-cleaning.

So it is absolutely suitable to be the material of an outdoor statue.

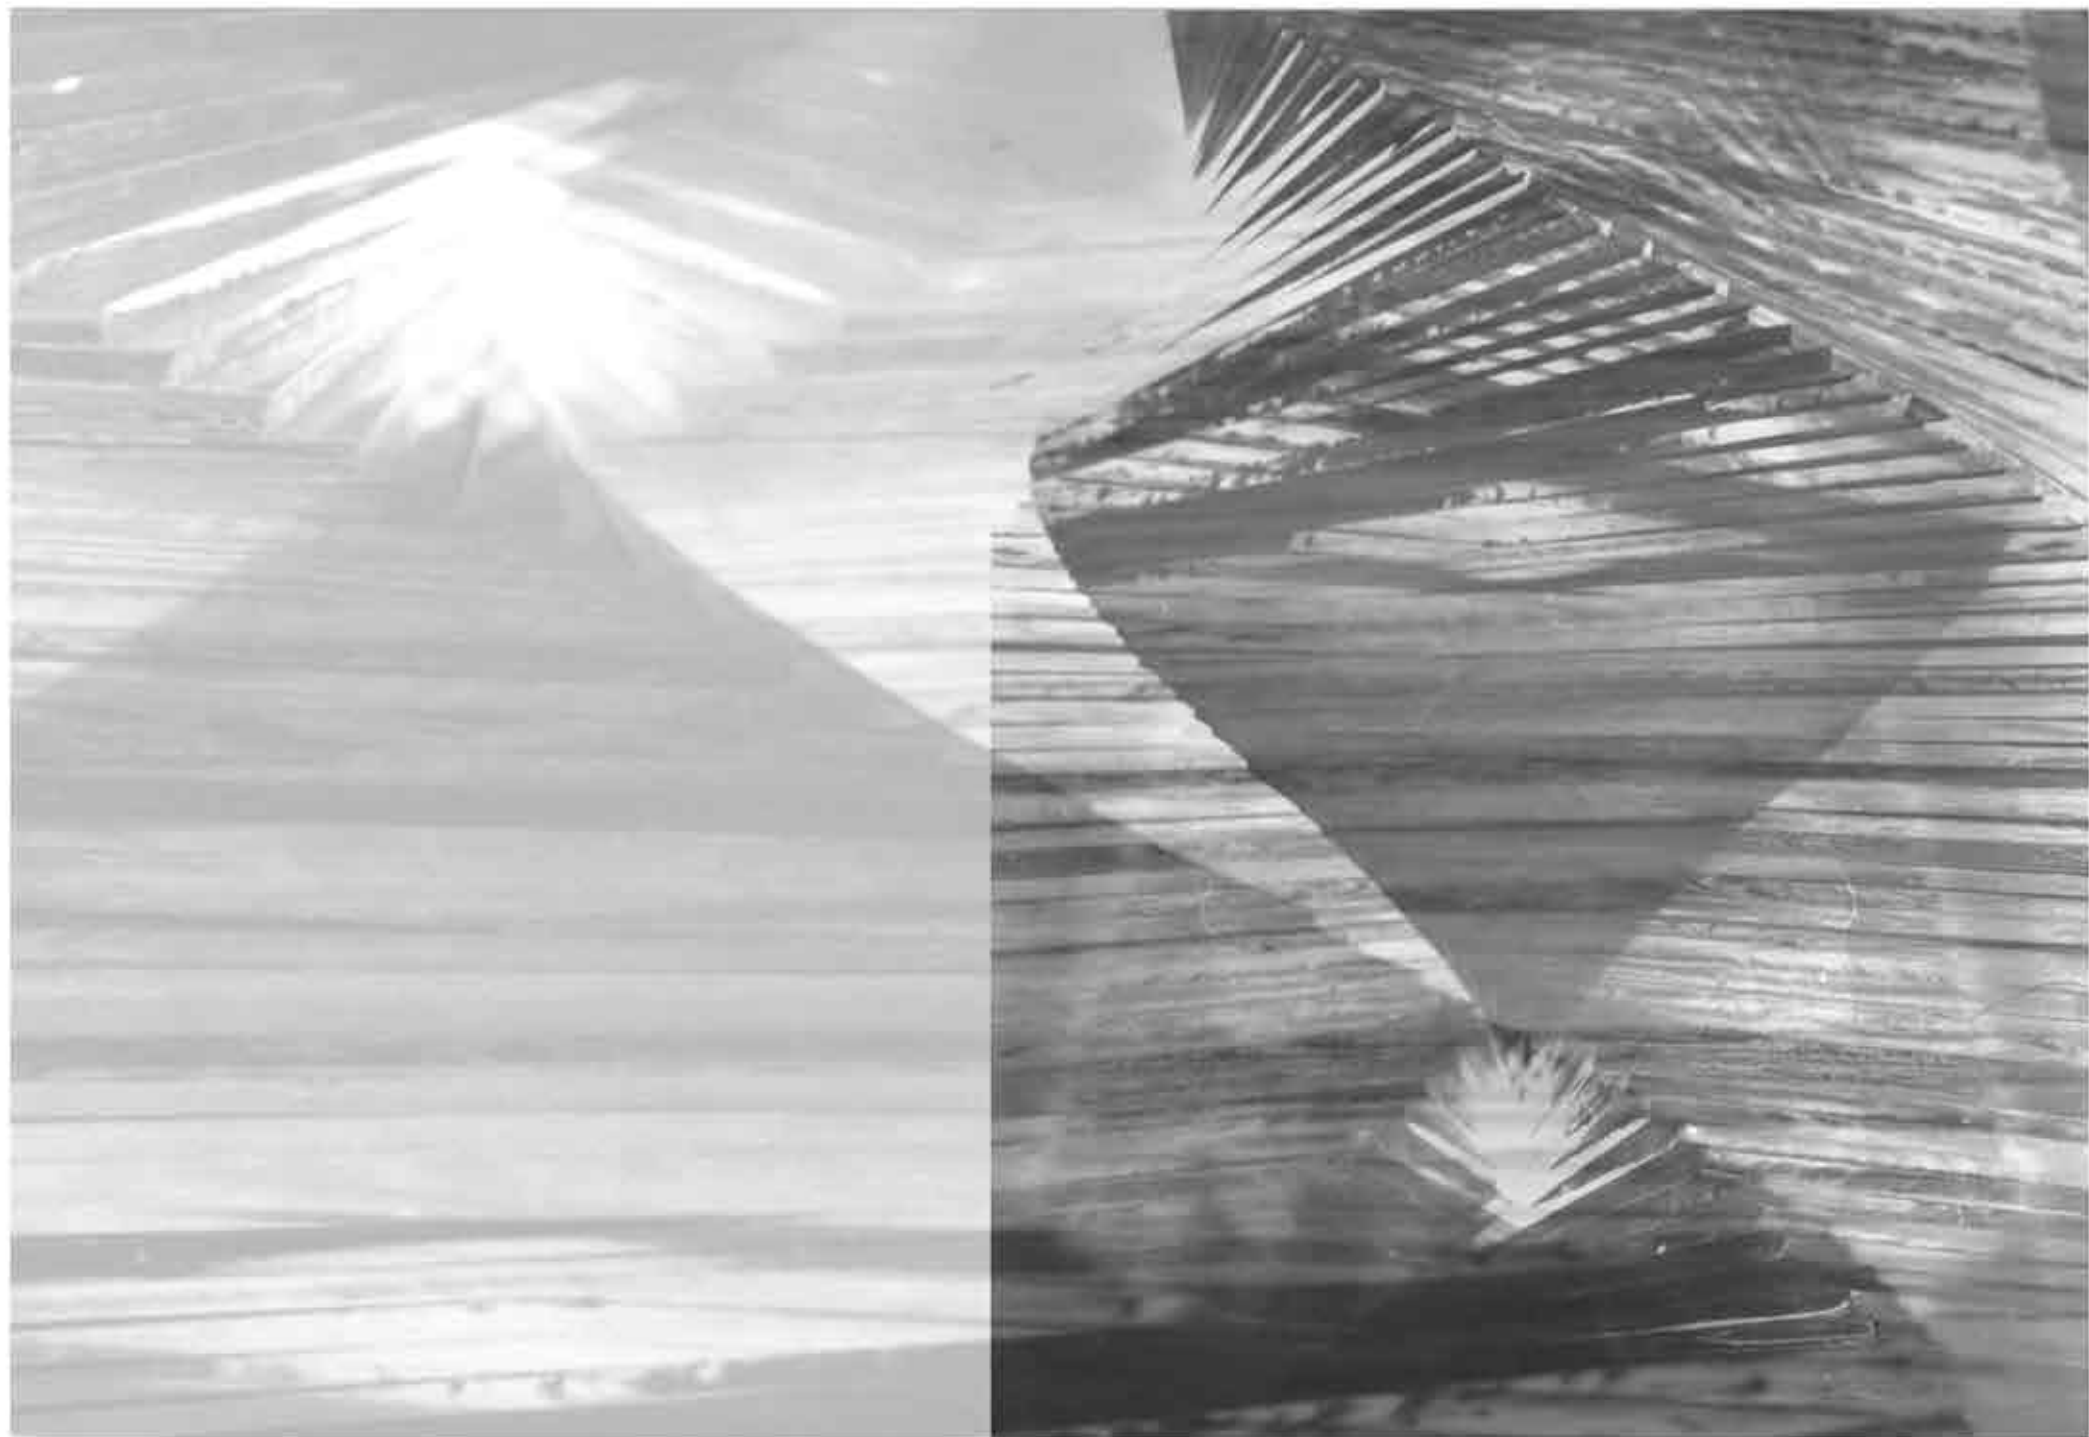

A big sized glass sculpture is a good implement to complete a public space, is a very exciting object from architectural point of view as well.

It should be an autonomous part of public space statuary.

I experimented and worked a lot in the last years, decades with glass, as you will see in the next pages, and you can read my next project idea at the end of this brochure.

your faithfully,
Csertő Lajos
sculptor

SPIRAL
MADE OF
LAMINATED GLASS

FEATURES OF THE GLASS:
10 MM THICK
(FLOAT GLASS)

EACH PIECES ARE PIERCED

DIAMETER OF THE BORE-
HOLE:
60 MM

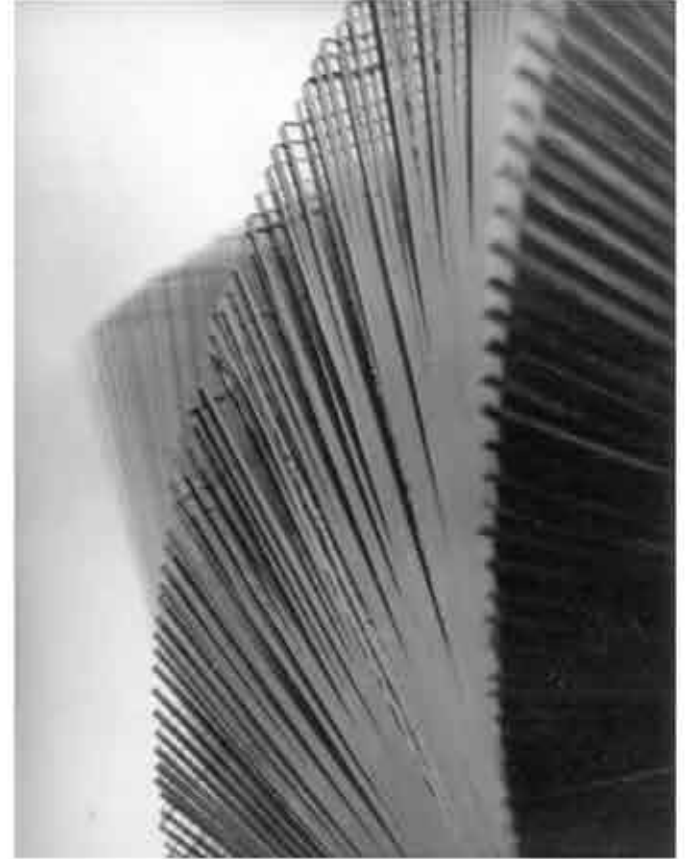

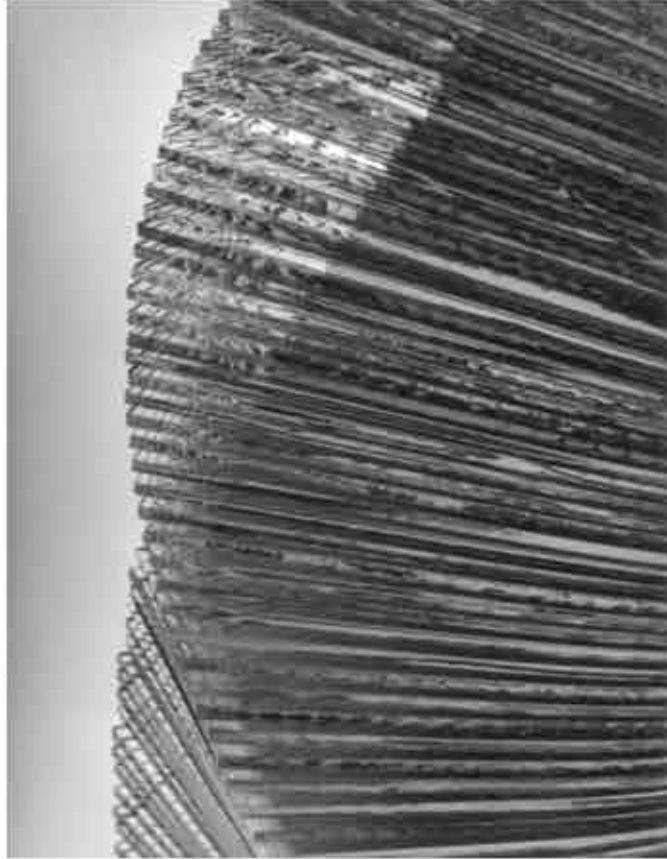

FRAME:
CHROME STEEL STICK

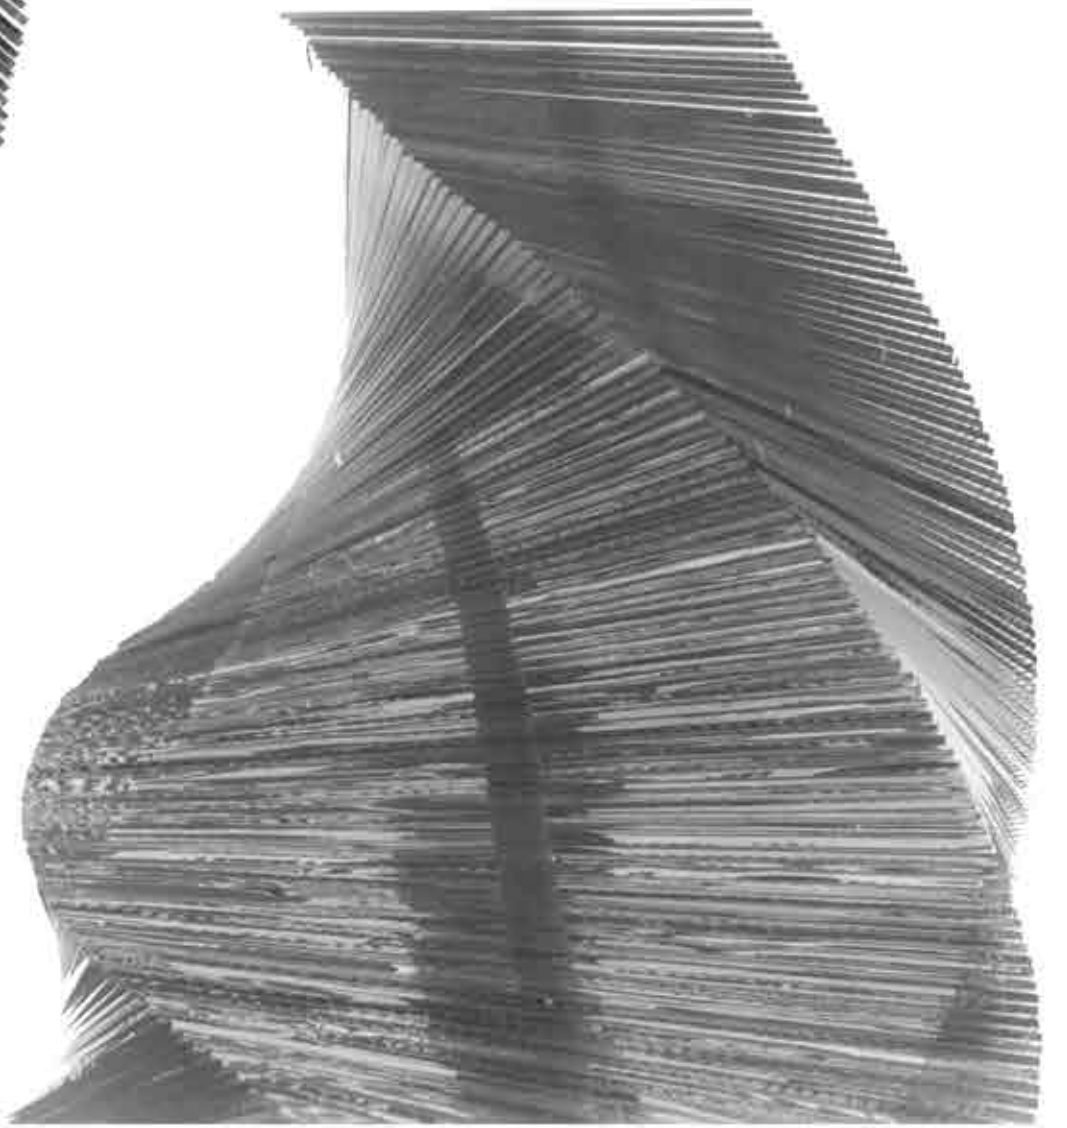

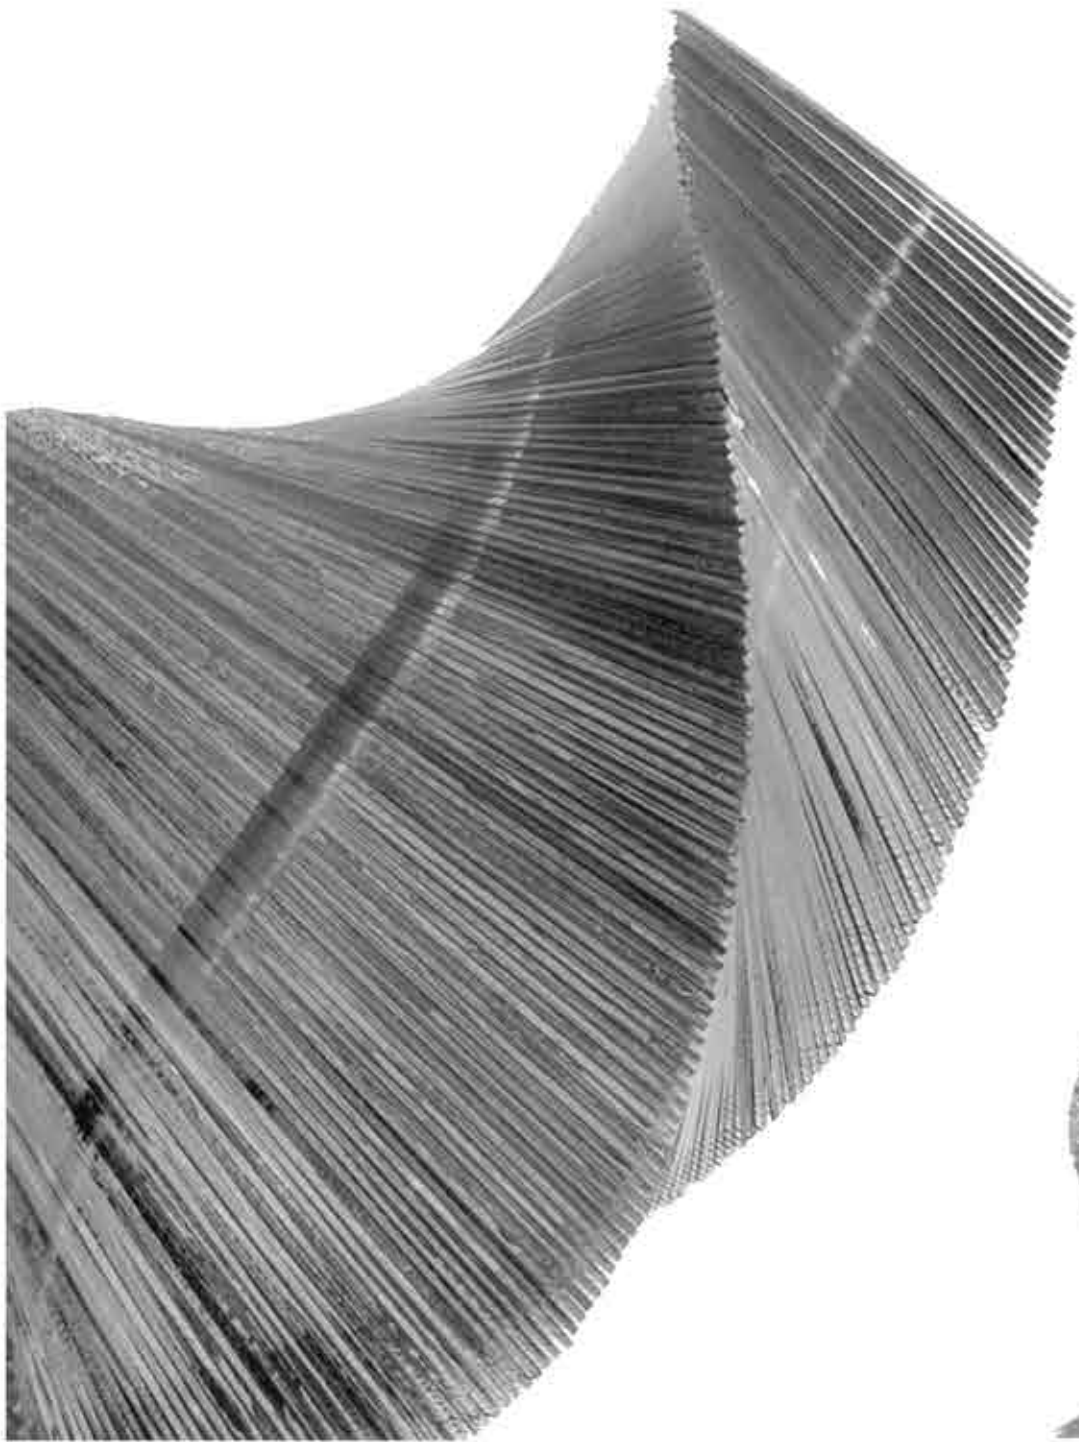

SIZE:
2,5 METERS

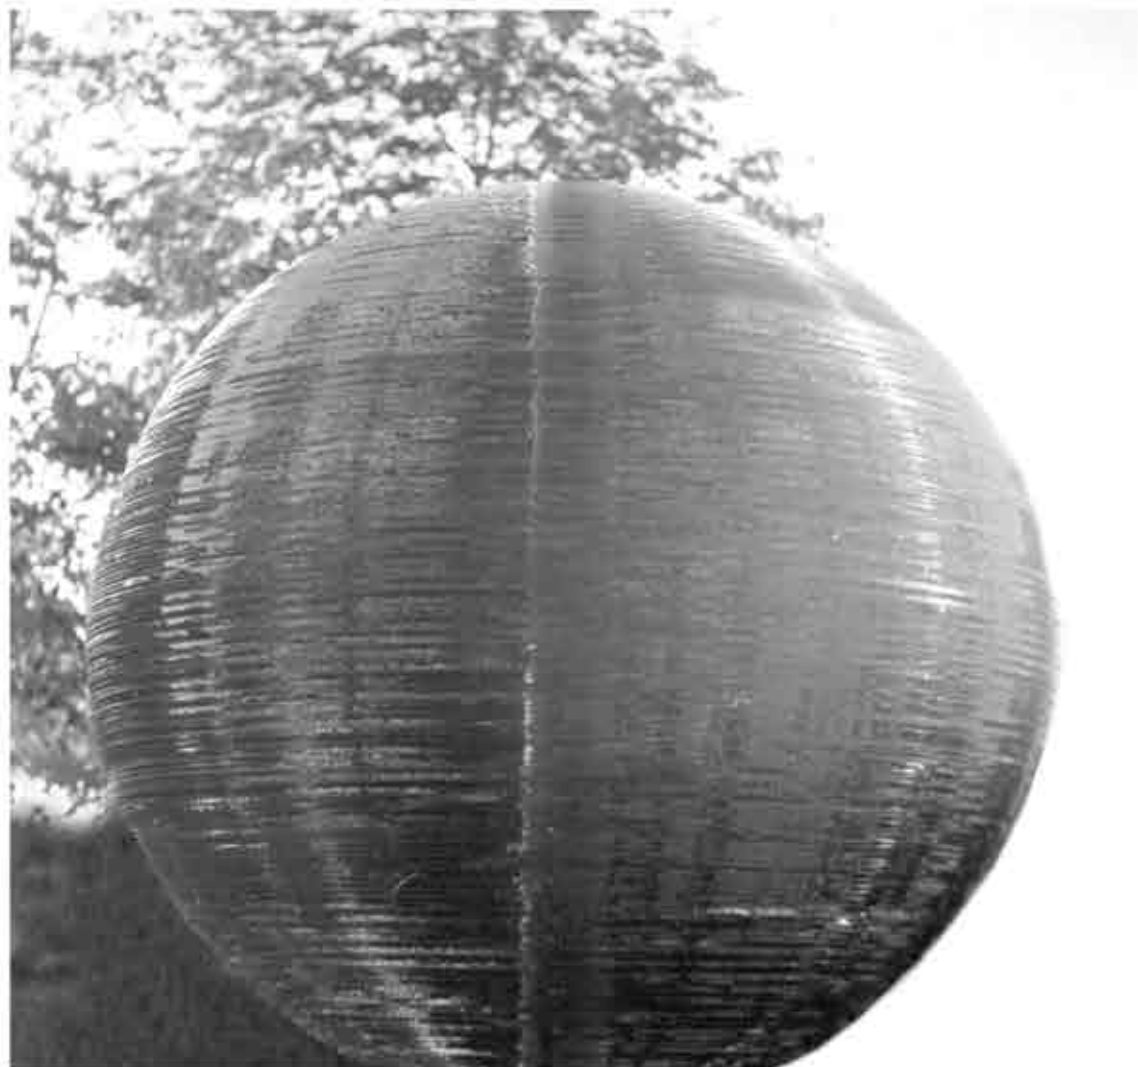

TRUNK

GLASS GLOBE
DIAGONAL : 1.0 METERS

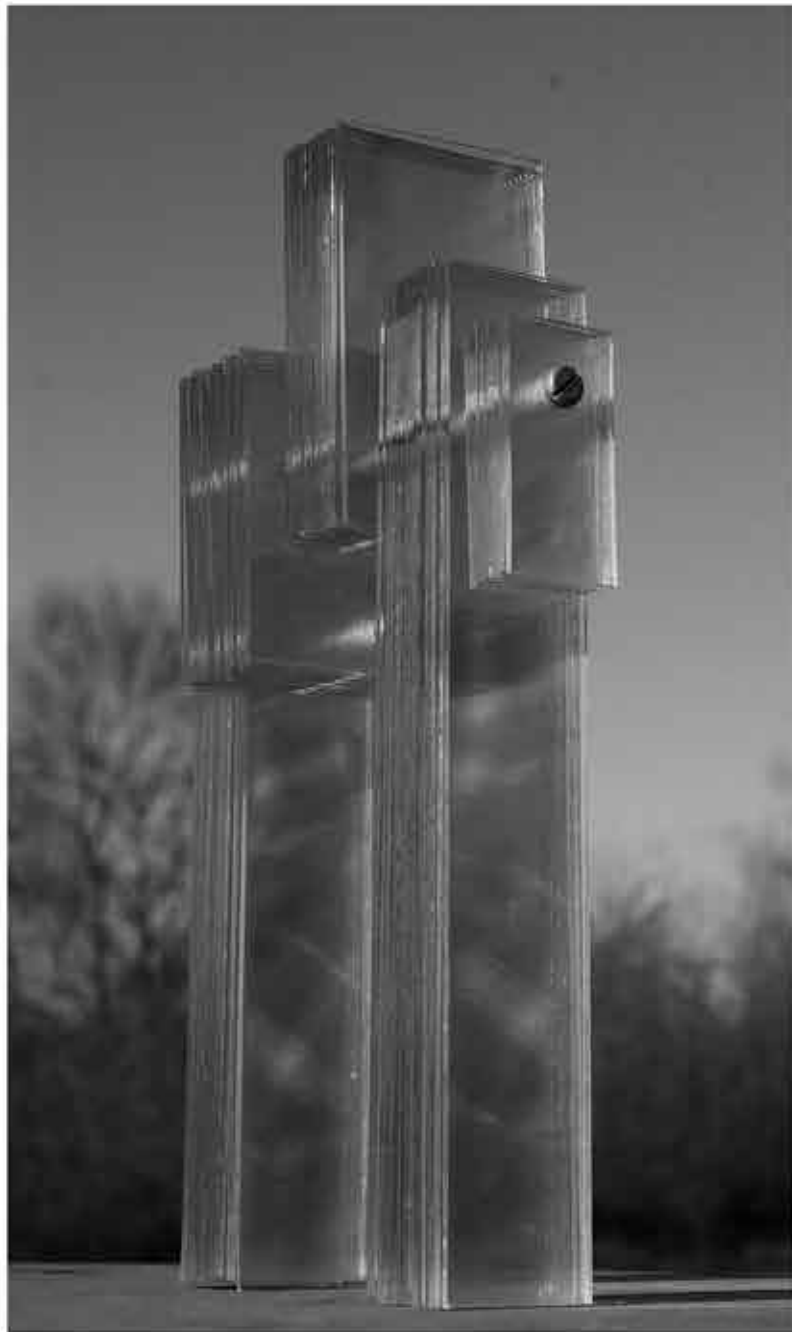

GLASS CYLINDER
HEIGHT: 2.5 METERS

My latest idea for glasswork

I plan to make a new series from those large laminated glass sculptures.

I would like to exhibit them at the Venice Biennale 2013 or 2014, along the beach, from the Giardini to the Palazzo Ducale.

The location is very important, because I want to use the water, the natural move itself to animate the sculptures with the refraction of the glass.

The continuous motion of the water will enrich the glass sculpts with an additional layer and feature.

As I mentioned before these are outsize glass statues, the maximum height of the spiral and cylinder shape is 6 meters, of the globe 2 meters.

I can carry moving sculpts out as well. In this case the flakes are turning round about the axis. (the chrome steel frame)

The maximum sizes are the same in this case.

I would like to get in touch with a glass fabric to collaborate, and contact the Biennale organizer team.
